Note 1: Breakage income from expired one-year prepaid cards has been recognized for China and Malaysia since November 2015 and January 2016, respectively. In China, moreover, taxation in the service industry was changed from sales tax to value-added tax in May 2016. As a result, sales have decreased by approximately 6%, but this has been offset by sales tax (booked as expenses) decreasing in an amount exceeding the decrease in sales, so that the effect on profits is positive.

Note 2: The November 2015 sales of China are irregular as the process of recognizing breakage income started in November 2015 (year-on-year sales for November 2015 is 165.2% for existing stores). Year-on-year sales for November 2016 excluding the effect of breakage income, value-added tax and the working day factor, is 102.8% for existing stores.
